

# SAVE MONEY, BREATHE EASY.

## Get \$200 to \$1600\*

Receive a big discount when you retrofit your old wood burning fireplace with a new electric or gas clean-burning, energy-efficient unit.

### WHY SWITCH?

- Scientific studies have demonstrated that wood smoke is a hazardous air pollutant containing many of the same toxic contaminants as second-hand cigarette smoke.
- Health studies have linked air pollution to serious health problems including decreased lung function, aggravated asthma, irregular heartbeat and premature death.
- Sensitive groups such as people with existing heart and lung disease, the young and the elderly are particularly at risk to the health impacts of wood smoke.
- New electric or gas fireplace units are more efficient at heating your home.
- You could save from \$200 to \$1,600 on a new, more efficient unit.
- Switching to a new, more energy efficient unit can help improve the value of your home.
- Help make your community a better place to live with cleaner air by making the switch.

\*Only households and businesses with existing wood-burning devices in selected ZIP codes are eligible. Households that meet low-income criteria qualify for higher incentive amounts. Please see [www.aqmd.gov/fireplaceincentive](http://www.aqmd.gov/fireplaceincentive) for ZIP code and low income incentive eligibility.
